

TAMILSELVAN M

Cloud & DevOps Engineer

Chennai, India | +918778597995 | sktamilvb@gmail.com | <https://linkedin.com/in/tamil8413> | <https://github.com/Cloud-Tamil>

PROFESSIONAL SUMMARY

Cloud Engineer with hands-on experience in cloud infrastructure management, deployment support, and monitoring across AWS, Azure, and GCP environments. Experienced in cloud operations within enterprise production environments. Familiar with Infrastructure as Code (IaC) concepts and basic knowledge of Terraform. Skilled in proactive monitoring, incident management, troubleshooting production issues, and maintaining high-availability systems with SLA adherence. Experienced in L2/L3 production support, deployment activities, backup monitoring, and operational support for enterprise applications.

TECHNICAL SKILLS

- Cloud Platforms:** Amazon Web Services, Microsoft Azure, Google Cloud Platform.
- Compute & Server-less:** EC2, Lambda, Virtual Machines, Azure Functions, Compute Engine.
- Storage:** S3, Blob Storage, Cloud Storage.
- Networking:** VPC, VNet, VPC, Load Balancer, DNS, Firewall, WAF, NACL, Security Groups, NSG, VPN (Site-to-Site, Point-to-Site), TCP/IP.
- Identity & Security:** AWS IAM & Identity Center, Azure Entra ID (Azure AD), RBAC, AWS KMS, Azure Key Vault, CloudTrail.
- Infrastructure as Code:** Terraform, CloudFormation.
- Containers & Orchestration:** Docker, Kubernetes (EKS, GKE).
- CI/CD & DevOps:** GitHub Actions, Azure DevOps.
- Monitoring & Observability:** Prometheus, Grafana, CloudWatch, Monitor, Cloud Monitoring, ManageEngine, Site24x7.
- Scripting & Automation:** Linux Shell Scripting.
- FinOps & Cost Optimization:** Cost Explorer, Cost Management, Reserved Instances, Spot Instances, Savings Plans, Auto Scaling, Right-Sizing.
- Incident Management:** L2/L3 Production Support, SLA Compliance, Disaster Recovery, Business Continuity Planning.

PROFESSIONAL EXPERIENCE

Associate Operations Engineer — L2/L3 Support | 3i-Infotech Ltd., Chennai, India

January 2024-Present

- Designed and optimized scalable, secure, and highly available multi-cloud architectures across AWS, Azure, and GCP, supporting production workloads and improving overall system performance.
- Architect solutions to reduce system downtime by 50% through implementation of proactive monitoring, automated remediation, and resilient design patterns, achieving 99.9% SLA compliance.
- Implemented Infrastructure as Code using Terraform to standardize provisioning and enforce consistent architecture across AWS and Azure environments.
- Drove 30% cost optimization by designing efficient resource utilization strategies, including auto-scaling architectures, right-sizing, and adoption of Reserved and Spot Instances aligned with FinOps practices.
- Strengthened cloud security architecture by implementing IAM least-privilege models, RBAC, network segmentation using Security Groups and NSGs, and centralized audit logging with AWS CloudTrail.
- Designed Disaster Recovery (DR) and Business Continuity architectures, including multi-region deployments, backup strategies, and automated failover mechanisms.
- Provided L2/L3 technical support for complex infrastructure issues including network outages, VM failures and performance bottlenecks, ensuring rapid SLA-compliant resolution.
- Led cross-functional collaboration with development, networking, and security teams to define architecture standards, resolve complex issues, and improve system resilience.

- Supported cloud transformation initiatives, including on-premises to cloud migration, workload assessment, and architecture design for scalable deployments.

Cloud Engineer — Monitoring & Support | 3i-Infotech, Chennai, India

June 2022–December 2023

- Designed and implemented real-time monitoring dashboards and automated alerting using AWS CloudWatch and Azure Monitor, enabling proactive detection of performance issues, security anomalies, and system failures.
- Managed cloud incident response across AWS and Azure environments, ensuring timely resolution and minimal service disruption.
- Maintained high availability and SLA compliance (99.9%) through regular system audits, proactive maintenance, and implementation of redundancy and automated failover strategies.
- Resolved L2/L3 incidents related to performance bottlenecks, network outages, and system failures across multi-cloud environments.
- Collaborated with security teams to implement vulnerability scanning, patch management, and compliance reporting, improving overall cloud security posture.

KEY ACHIEVEMENTS

- 50% Reduction in System Downtime:** Implemented proactive monitoring and automated alerting using AWS CloudWatch and Azure Monitor across multi-cloud production environments.
- 30% Cloud Cost Savings:** Delivered FinOps-driven optimization through auto-scaling, right-sizing, use of Reserved and Spot Instances, and elimination of idle resources.
- 40% Reduction in Provisioning Time:** Automated cloud infrastructure provisioning using Terraform, reducing deployment time from 2 hours to 15 minutes.
- 35% Improvement in Resource Utilization:** Deployed containerized workloads on Kubernetes (EKS, AKS, GKE), enabling efficient horizontal scaling and optimized resource allocation.

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate** (AZ-104)
- AWS Certified Solutions Architect – Associate** (SAA-C03)
- AWS Certified Cloud Practitioner** (CLF-C02)
- Oracle Cloud Infrastructure Foundations Associate** (OCI 2023)
